

Hygiene regulations in the subject libraries from 03 August 2020

In accordance with § 4 Abs. 5 CoronaVO of the state of Baden-Württemberg the access to the library rooms is regulated, queuing must be avoided and a minimum distance of 1.50 m to other persons must be maintained. To serve this purpose and to comply with the rules of hygiene the following measures are taken.

Mouth and nose protection

Within the library it is mandatory to wear a mouth and nose protection in circulation areas (corridors, staircases, printers, copiers, scanners) and in communal rooms (e.g. washrooms). At the workstations you can take off the mask as long as the minimum distance is observed.

Restricted access

The subject libraries open to members of the University of Mannheim, members of cooperating institutions and users with a library card. A seat booking is mandatory for members of cooperating institutions and users with a library card.

Entering and leaving the library is recorded with the ecUM or the UB chip card to check the access authorization, to determine the number of available seats and to enable contract tracing in case of a corona infection.

According to § 7 CoronaVO, persons who have had contact with a person infected with the corona virus in the last 14 days or who show symptoms of a respiratory tract infection, loss of smell and taste or elevated temperature are not allowed to enter.

Keeping the minimum distance

In the foyer and inside the libraries, the minimum distance of 1.5 m to other persons must always be maintained.

Using the library

Only the unblocked tables are available for use. Printers, copiers, scanners and a reduced number of workstations may be used. Working in groups is not permitted, group study rooms are closed. Lockers may not be used.

Cleaning

We ask you to clean the surfaces of the copiers and scanners before use. Appropriate means are available on site. Library staff regularly clean the contact surfaces of publicly accessible equipment.
