

The FDZ supports researchers in collecting, (pre-)processing, curating, archiving and sharing their research data:

Project planning

- Funding bodies' guidelines regarding research data (DFG, BaWü Stiftung...)
- Data management plans (ERC Grants, EU...)

Could you help me create a DMP for my proposal?

What costs for research data management could I apply for in my grant proposal?

Project realization

- Collecting data (harvesting through web, API, automated text recognition/ OCR, speech2text, German Internet Panel...)
- Re-using data (licenses & copy rights)
- (Pre-)processing data (cleaning, linking, LLMs, chatbots...)
- Documentation and replicability

Could you help me to extract data from annual reports and link it to company data sets?

Could you help me scraping data from the web?

Could you help me with automated speech-to-text recognition from recorded interviews?

Could you help me with LLMs and chatbots?

Project completion

- Archiving, sharing, presenting data (open/restricted)
 - Infrastructure (MADATA, MAObjects)
 - Consulting on other options
- Consulting on replication packages

How can I share sensitive data?

Where can I archive my data?

How do I create a replication package for my paper submission?

Trainings and events

- "Data Literacy Essentials" for students
- "Research Skills" for advanced students and PhD students
- Customized trainings on research data management
- OCR consultation hour

We are happy to help - feel free to contact us!
