

The University Library Mannheim offers a temporary full-time position starting at the earliest possible date for a

IT Specialist (m/f/d) (TV-L E 13)

As part of a project this is a 24 months position that can be split into two part-time roles.

This OCR-D coordination project initiated and funded by the DFG (Deutsche Forschungsgemeinschaft) aims to develop a comprehensive procedure for the mass full text digitization of historical prints in the German-speaking countries. The University Library Mannheim has been participating in the OCR-D project since 2019.

Our project partners for the implementation project „Integration von Kitodo und OCR-D zur produktiven Massendigitalisierung“ are the SLUB Dresden as well as the University Library Braunschweig.

The University Library Mannheim extends the visualization component Kitodo.Presentation and the DFG Viewer by the OCR-on-demand feature. Thus, users will be able to request a text recognition service even for those historical prints that have not been digitized yet.

The working language in this project is German or English.

Your responsibilities:

- Develop software (web application in TYPO3, PHP, JavaScript)
- Liaise with other OCR-D projects and users (libraries) to coordinate the requirements
- Compile documentation, presentations, and reports
- Assist with the Optical Character Recognition (OCR) of the digital copies as well as the following automated post-correction process
- Assist with the project management

Required:

- Completed university degree (Master's degree or equivalent) in computer science or related field
- Interest in the OCR feature for historical prints

The University of Mannheim is a scientific university with an excellent track record in research and teaching. It has about 2.630 employees and about 12.000 students. In particular, in the field of economics and social sciences, which has traditionally been strongly represented, the University of Mannheim is one of the top-ranked universities both nationally and internationally. A special characteristic is the high degree of networking between the five faculties.

The University Library is the central information infrastructure unit of the University of Mannheim and is responsible for the provision of information to the university.

Start: at the earliest possible date

Limitation: 24 months

Job grading TV-L E13

Working hours: currently 39,5 hours, divisible
